

Operator Qualification Training

CDI Services has NCCER (National Center for Construction Education and Research) Certified Master Trainers and Craft Instructors, as well as ENERGY worldnet Certified Master Trainers and Master Evaluators on staff to train, test and evaluate your employees as they progress in their skill sets as professional Pipeline/Construction crafts-personnel. We provide the required NCCER and ENERGY worldnet certification information to the National Registry and, if you partake in their program, ultimately to ISNetworld through this system. Additionally, each trainee with a full Level of Completion receives a Certificate and Wallet Card. As an NCCER Accredited Training Sponsor and an ENERGY worldnet Authorized Training and Assessment Center, CDI Services offers in-house as well as mobile training and certification services. This means that you can utilize our facilities located in Tomball, TX and Kountze, TX or you have the luxury of having CDI Services come you, even at your jobsite.

VERIFORCE Certified Evaluators and Performance Verifications are also available.

A flexible, accredited and cost-effective way to create your own in-house training program.

NCCER Core Curriculum

Comprehensive basic skills training for the construction industry. NCCER Core Curriculum consists of 9 modules which covers the following material:

- Basic Safety (Construction Site Safety Orientation) – Meets OSHA 10 Hour Requirements
- Introduction to Construction Math
- Introduction to Hand Tools
- Introduction to Power Tools
- Introduction to Construction Drawings
- Introduction to Basic Rigging
- Basic Communication Skills
- Basic Employment Skills
- Introduction to Material Handling

Construction Management

CDI Services offers the following courses in Construction Management with NCCER Certification:

- Crew Leadership
- Project Supervision
- Project Management

Emergency Care Safety Training

CDI Services believes that emergency and health training should be easy to access, straightforward in its presentation, affordable and practical. Information should be presented in a way that meets each client's needs in order to overcome the obstacles of learning. Our EMS training is just that.

The goal of training should be more than compliance, but rather learning, understanding and applying knowledge to each individual's life in order to improve it and make it safer. The co-worker that you train may be the person to reach your side first in an emergency.

We offer training and certification for:

- Basic First Aid
- BBP / CPR & AED
