DIVERSIFIED TRAINING OPTIONS

OQ-TRAINING

Accredited Training Sponsor

CDI Services has NCCER Certified Master Trainers and Craft Instructors on staff to train and test your employees as they progress in their skill sets as professional Pipeline/Construction crafts-people. We provide the required NCCER certification information to the National Registry and , if you partake in their program, ultimately to ISNetworld through this system. Additionally, each trainee with a full Level of Completion receives a Certificate and Wallet Card. As an accredited Training Sponsor for NCCER (National Center for Construction Education and Research) CDI offers in-house as well as mobile training and certification. We offer a facility for training or we can come to you even at your jobsite.

VERIFORCE Evaluators and Performance Verifications are also available.

OSHA AUTHORIZED TRAINING

CDI Services provides OSHA training and certification. Complete Instructor Led classes available for;

OSHA 10 HOUR CERTIFICATION

OSHA 30 HOUR CERTIFICATION

Training at our facility, at your facility or at your jobsite.

CONSTRUCTION SITE

SAFETY TRAINING

Our in house Construction Site Safety Master (CSSM) provides Instructor led training, testing and certification in a variety of Construction Safety curriculums. These courses are provided at our facility or they can be conducted at remote locations through our Mobile Training Unit.

Construction Site Safety Technician

Field Safety, Safety Orientation & Safety Technology
100 hours - 22 Modules and 15 Orientation Topics

Construction Site Safety Supervisor

Field safety & Safety Orientation
45 hours – 9 Modules and 15 Orientation Topics

Construction Site Safety Orientation

Safety Orientation – 15 Orientation Topics
Meets OSHA 10 hour requirement

CONSTRUCTION MANAGEMENT

We offer the following courses in Construction Management with NCCER Certification;

- CREW LEADERSHIP
- PROJECT SUPERVISION
- PROJECT MANAGEMENT

CDI Services believes that emergency and health training should be easy to access, straightforward in its presentation, affordable and practical. Information should be presented in a way that meets each client's needs in order to overcome the obstacles to learning.

The goal of training should be more than compliance, but rather learning, understanding and applying knowledge to each individual's life in order to improve it and make it safer. The co-worker you train may be the person to reach your side first in an emergency.

We offer training and certification for;

- Basic First Aid
- BBP/CPR & AED
- ADULT/CHILD/INFANT
